1 Introducing the Poseidon Retail

For the past few years, store owners had been solely dependent on traditional cash registers in completing their sales. But with the advent of technology, retail and department store owners have been given more options to choose from. Today, they can freely choose what type of system would suit their business best.

Point of Sales (POS) system has started to replace the traditional cash registers these days because of the convenience and other important benefits that it offers.

Poseidon Retail Point of Sale (POS) is a computerized system that is designed to help retailers record their sales transaction, track inventory, manage financial transactions, and streamline customer checkouts.

With the use of **Poseidon Retail**, you need not to sort through hundreds of receipts to finish your sales report because the system automatically provides real-time inventory of sales transactions that happened within the day.

Hence, Poseidon Retail helps you simplify your accounting process and keeps your records updated.

1.1 About the User's Guide

The **Poseidon Retail User's Guide** is designed to provide detailed information about the Poseidon Retail-POS procedures which you will need to be able to use the POS. This user's guide will help you understand how Poseidon Retail operates. This will also help you learn how to set up the POS, manage your product inventory, make a sales transaction, and run a sales report.

1.2 Understanding the Conventions, Symbols, & Buttons

This section explains the conventions and symbols used throughout the textbfPoseidon Retail User's Guide as well as the buttons visible on the POS screen.

1.2.1 Conventions

The following conventions will help you better understand and more efficiently use this manual.

Conventions	What it Means
Function Keys	The keys that you press to perform a function. Example: [ENTER] , [Ctrl+E]
Prompts	The messages and notifications you receive from the system. Example: 
Buttons	The buttons found on the POS screen that allow you to perform a specific function. Example: 

1.2.2 Symbols

The following symbols are used throughout this manual.

Symbol	What it Means
	Contains special information about a feature
	Contains an important information that needs to be followed.

1.2.3 Buttons

The following buttons are found on the POS interface.

Press	To
	Add a new record
	Edit or modify an item's description or an employee's profile
	Change an employee's password
	Commit the receiving transactions and update the item's quantity
	Get an easy access to the Task Menus
	Change the quantity of items entered to the transaction
	Delete an item from the Product Selection Table
	Cancel a transaction
	Settle the sales transaction
	Invalidate a transaction
	Apply a discount to current line items on a transaction
	Reprint receipts from the latest and/or previous transactions
	Lock your register
	Close and end your shift
	Log out of the Manager or POS view

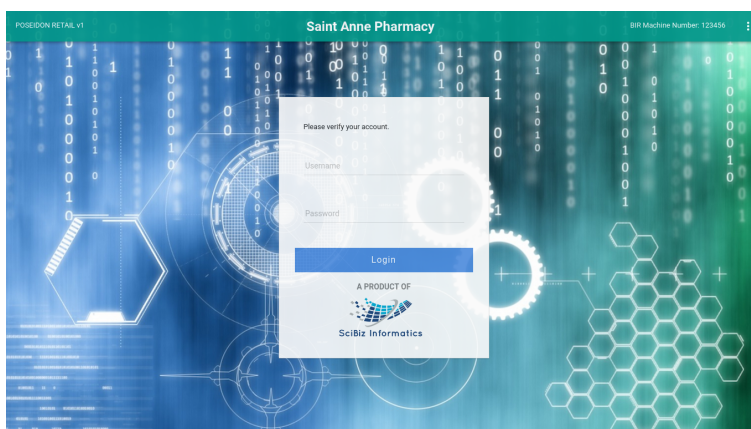

2 Getting Started with POS

2.1 Launching the Poseidon Retail

Click the icon on the desktop to launch the Poseidon Retail – POS. The Poseidon program will then be opened, displaying the login interface.

2.2 Login Interface

Opening the Poseidon program by clicking on a Desktop icon brings the user to the **login interface** (see screenshot 1.0). Normally, this requires a valid username and a password to log into the Point of Sale system. After a successful login, the system will automatically direct to the user's designated workspace.

Screenshot 1.0

The system is divided into two workspaces: the **Back Office**, which handles the entire system control; and the **Cashiering**, which handles the client-side interaction and POS operation.

2.3 The Manager's View Screen

The **Manager's View Screen** is where all of the store information can be viewed. It provides different ways to easily get the information you need.

The numbers shown in screenshot 1.1 correspond to the descriptions below.

Poseidon		SERVER: LOCALHOST STATUS: ONLINE DATE: 06/03/2017 TIME: 09:40:58 AM POSEIDON RETAIL V1				
adminix						
Modules		Bar Code	Price	Qty on Hand	Profit Margin	Active

		CHILI CHEESE 1000	4809011681392	15.24	121	0.15 true
		ADOB0 300	4809011681071	5.18	201	0.15 true
		ADOB0 1000	4809011681095	15.24	100	0.15 true

Screenshot 1.1

1. **Menus** – provide easy access to all of your store information such as product inventory, HR information, and sales reports
2. **Content Pane** – displays information such as the list of product inventories
3. **Status Bar** – displays status information such as the current date and time, and the person who is currently logged into POS

3 Back Office

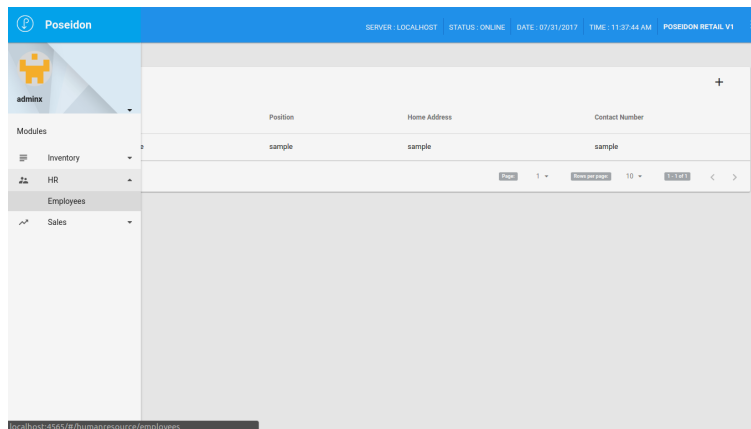

The Back Office provides the store owners a control over product inventory, sales information, employees' information, and cash management.

3.1 Human Resources

The Poseidon Retail provides Human Resource Management (HRM) that helps store owners record, manage, and track their employees' information with regard to subjects of human resources.

3.1.1 Adding Employees

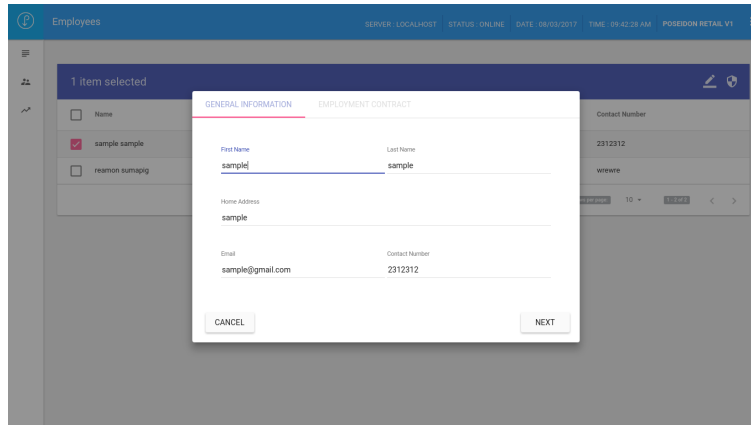

In order to add a new employee, press the  button located on the left side of the control panel and click  button found under **[HR]**. Press the  button found on the upper right side of the table (see screenshot 1.2).

Screenshot 1.2

In the **general information** field (see screenshot 1.3), type the employee's name, home address, email address, and contact number.

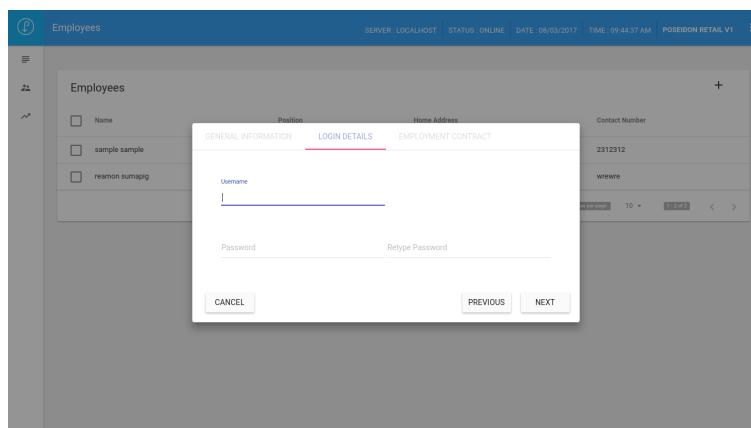

Supply all the information that the system requires and click NEXT button to proceed.

A screenshot of a web application interface for managing employees. A modal window titled 'GENERAL INFORMATION' is open, showing a form for adding a new employee. The form has two tabs: 'GENERAL INFORMATION' (active) and 'EMPLOYMENT CONTRACT'. The form fields are: First Name (sample), Last Name (sample), Home Address (sample), Email (sample@gmail.com), and Contact Number (2312312). There are 'CANCEL' and 'NEXT' buttons at the bottom of the modal. In the background, a table lists employees with columns for Name, Position, Home Address, and Contact Number. The table shows three entries: 'sample sample', 'sample sample', and 'reamon sumapig'.

Screenshot 1.3

The next to be filled out are the **login details** of the employee. Login details include employee's valid username and password (see screenshot 1.4). Enter the employee's username and password in the login details field, confirm the password by retyping it, and click NEXT button to continue.

A screenshot of the same web application interface. The modal window now shows the 'LOGIN DETAILS' tab. The form fields are: Username (I), Password, and Retype Password. There are 'CANCEL', 'PREVIOUS', and 'NEXT' buttons at the bottom of the modal. The background table is still visible, showing the same three employee entries.

Screenshot 1.4

Lastly, fill out the details for the **employment contract** of the employee. The contract includes the position of the employee, the group where the employee belongs, the start and end of contract of the employee. (See screenshot 1.5)

Screenshot 1.5

After filling out all the needed information, press **SUBMIT** button to save the the employee's information into the system.

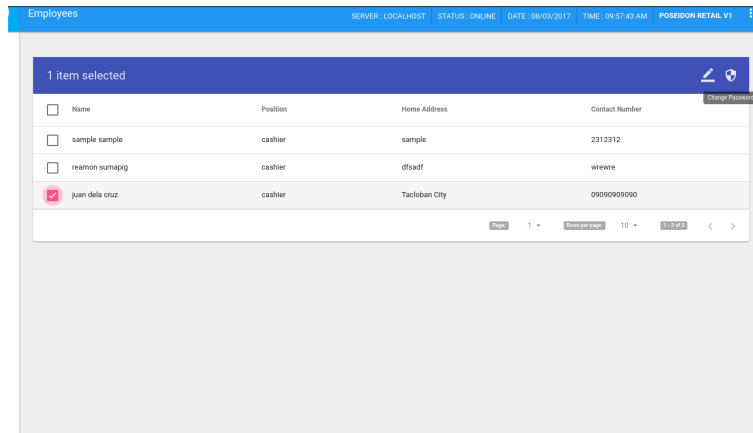

3.1.2 Editing the Employee's Profile

From the [HR] menu, click [EMPLOYEES] button, and mark the employee's name whose profile needs to be edited. Press  button to start editing (see screenshot 1.6).

Name	Position	Home Address	Contact Number
☐ sample sample	cashier	sample	2312312
☐ reamon sumapig	cashier	dfsadf	wrewe
☒ juan dela cruz	cashier	Tackoban City	0909090909

Screenshot 1.6

And if you wish to change the employee's password, all you have to do is to simply mark the name of the employee and press  button, which is located on the upper right side of the table, beside the [EDIT] button (see screenshot 1.7). The system will then direct to employee's login details.

☐	Name	Position	Home Address	Contact Number	
☐	sample sample	cashier	sample	2312312	
☐	reamon sumapig	cashier	dfsadf	wrewe	
☒	juan dela cruz	cashier	Tacloban City	0909090900	Change Password

Screenshot 1.7

Warning

KEEP YOUR PASSWORD SECURED.

1. Be sure to use a strong password.
2. A **strong password** includes a combination of different characters from these group: numbers, symbols, upper-case, and lower-case letters

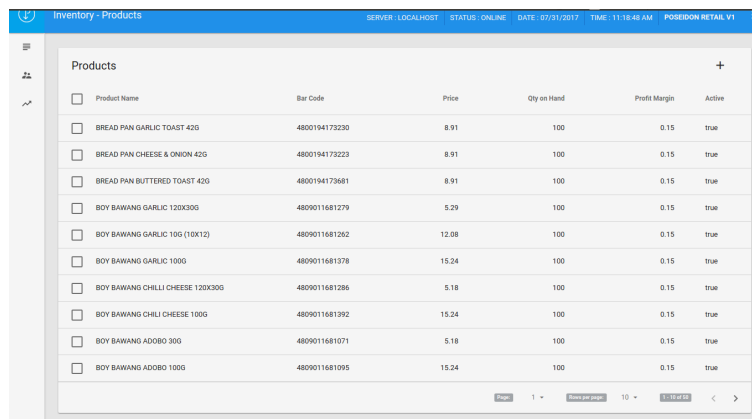

After replacing the old password with a new one, click the [SUBMIT] button.

3.2 Managing the Product Inventory

Poseidon Retail also provides a comprehensive **product inventory** that allows retailers to easily load and organize their products as well as to track their sales progress (see screenshot 1.8).

Managing the product inventory improves accuracy of inventory orders, increases efficiency and productivity, and helps save more time and money.

In order to add new products, just press the  button located on the upper right side of the table.

	Product Name	Bar Code	Price	Qty on Hand	Profit Margin	Active
☐	BREAD PAN GARLIC TOAST 42G	4800194173230	8.91	100	0.15	true
☐	BREAD PAN CHEESE & ONION 42G	4800194173223	8.91	100	0.15	true
☐	BREAD PAN BUTTERED TOAST 42G	4800194173681	8.91	100	0.15	true
☐	BOY BAWANG GARLIC 120X30G	4809011681279	5.29	100	0.15	true
☐	BOY BAWANG GARLIC 10G (10X12)	4809011681262	12.08	100	0.15	true
☐	BOY BAWANG GARLIC 100G	4809011681378	15.24	100	0.15	true
☐	BOY BAWANG CHILI CHEESE 120X30G	4809011681286	5.18	100	0.15	true
☐	BOY BAWANG CHILI CHEESE 100G	4809011681392	15.24	100	0.15	true
☐	BOY BAWANG ADOBO 30G	4809011681071	5.18	100	0.15	true
☐	BOY BAWANG ADOBO 100G	4809011681095	15.24	100	0.15	true

Screenshot 1.8

3.2.1 Adding New Products

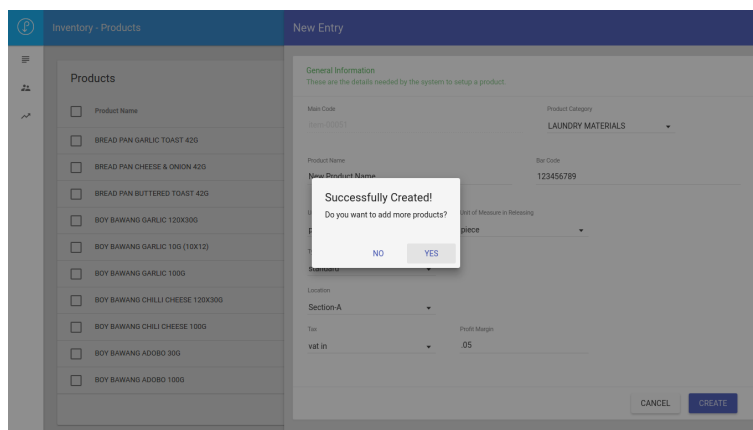

In most cases, the system asks a little information about the product (see screenshot 1.9). The user is advised to fill out all the fields wisely. Below are the descriptions of every field.

Screenshot 1.9

- **Main Code** – is a system-generated code used internally to track product movements and history
- **Product Category** – is a field used to classify a product to a category
- **Product Name** – is a field used to assign name or label for the product
- **Barcode** – is a field for machine-readable code used to identify the product. It is usually printed on the product itself.
- **Unit of Measure (Receiving)** – describes the unit of measure when the supplies for this product are received

- **Unit of Measure (Releasing)** – describes the unit of measure of how this product is being sold to customers
- **Type** – a field describing the product type
- **Location** – the assigned location for the product
- **Tax** – the product tax assignment
- **Profit Margin** – describes the profit for the product. The system assumes a decimal input for this field.

With Poseidon Retail, there's nothing to worry in adding new products. Usual details are already written for easier and faster product registration. Once done with the details, press **CREATE** button. A notification, confirming that the user has successfully added a new product, will pop up after this whole process (see screenshot 2.0).

Screenshot 2.0

All newly added products in the system are expected to have zero quantity (see screenshot 2.1). This is because Poseidon Retail is following an explicit flow of the product inventory process.

Product Name	Bar Code	Price	Qty on Hand	Profit Margin	
New Product Name	123456789	0.00	0	0.05	true
BREAD PAN GARLIC TOAST 42G	4800194173230	8.91	100	0.15	true
BREAD PAN CHEESE & ONION 42G	4800194173223	8.91	100	0.15	true
BREAD PAN BUTTERED TOAST 42G	4800194173681	8.91	100	0.15	true
BOY BAWANG GARLIC 120X30G	4809011681279	5.29	100	0.15	true
BOY BAWANG GARLIC 100 (10X12)	4809011681262	12.08	100	0.15	true
BOY BAWANG GARLIC 100G	4809011681378	15.24	100	0.15	true
BOY BAWANG CHILI CHEESE 120X30G	4809011681286	5.18	100	0.15	true
BOY BAWANG CHILI CHEESE 100G	4809011681392	15.24	100	0.15	true
BOY BAWANG ADORO 30G	4809011681071	5.18	100	0.15	true

Screenshot 2.1

The designated staff needs to navigate the receiving of products to be able to update the product's quantity (see screenshot 2.2). In order to add new receiving, just press the  button on the right side of the table.

Code	Invoice	Remarks	Date Created	Status
------	---------	---------	--------------	--------

Screenshot 2.2

For more detailed discussion about receiving supplies, turn to **page 14- Receiving Supplies**.

3.2.2 Receiving Supplies

Every receiving requires two important details: the **invoice number** and the **transaction details** (see screenshot 2.3).

An **invoice number** is a unique code or number that represents the supplier's issued receipt number. The system highly recommends tracking of references from the suppliers.

Inventory - Receiving

RR-00001

Receiving

Code Invoice

Invoice No.

Receiving (RR-00001)

Screenshot 2.4

After product selection, press the **Receiving (RR-00001)** button found at the bottom part of the table.

The system will refresh the transaction details and will be ready for product manipulation (see screenshot 2.5).

To specify the received quantity, double click the quantity of the product. Once done, click

SAVE

The screenshot shows the 'Inventory - Receiving' form for transaction RR-00001. The form is divided into two main sections: 'Receiving' on the left and 'Transaction Details' on the right. The 'Receiving' section has tabs for 'Code' and 'Invoice'. The 'Transaction Details' section contains a table with columns: Code, Product Name, Qty, Cost, and Total. A single row is visible with Code '00051', Product Name 'New Product Name', Qty '1', Cost '4', and Total '0.00'. Below the table, there are summary fields showing '1' for Qty and '0.00' for Total. At the bottom right, there are four buttons: 'ADD CONTENT' (red), 'REMOVE SELECTED' (grey), 'CANCEL' (grey), and 'SAVE' (blue).

Code	Product Name	Qty	Cost	Total
00051	New Product Name	1	4	0.00

Screenshot 2.5

After a successful save, the user needs to commit the receiving transaction in order to apply all the quantities to the product inventory (see screenshot 2.6).

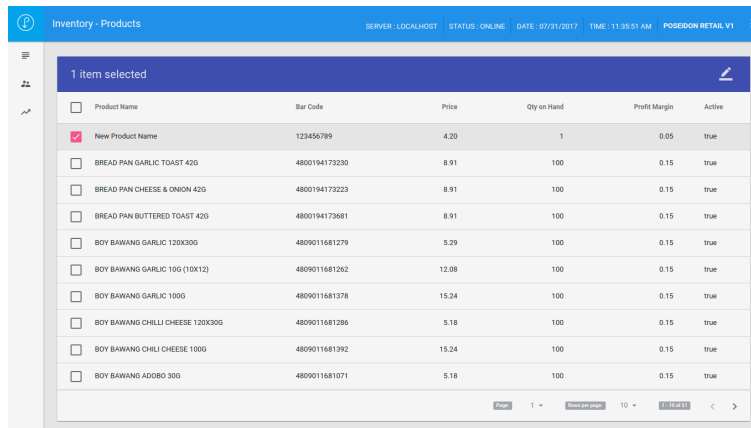

The screenshot shows the 'Inventory - Receiving' list view. At the top, there is a status bar with '1 item selected'. Below this is a table with columns: Code, Invoice, Remarks, Date Created, and Status. A single row is visible with Code 'RR-00001', Invoice '09-32312233', Remarks 'BULK RECEIVE', Date Created 'Jul 31, 2017', and Status 'COMPLETED'. Below the table, there are pagination controls showing 'Page 1' and 'Items per page: 10'.

Code	Invoice	Remarks	Date Created	Status
RR-00001	09-32312233	BULK RECEIVE	Jul 31, 2017	COMPLETED

Screenshot 2.6

3.2.3 Editing the Product's Description

If the user wishes to edit the product's description, choose the product whose details need to be changed, put a check on the small box  placed next to the product's name, and press the  button. This button is located on the upper right side of the table (see screenshot 2.7).

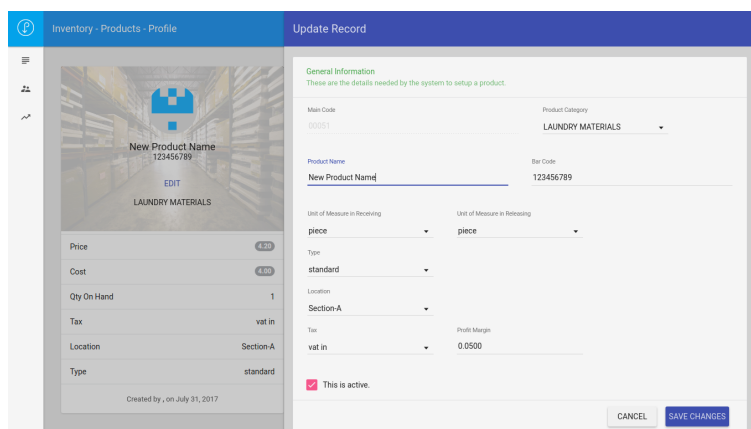

The screenshot shows a web application interface for 'Inventory - Products'. At the top, there's a status bar with 'SERVER: LOCALHOST', 'STATUS: ONLINE', 'DATE: 07/31/2017', 'TIME: 11:55:51 AM', and 'POSEIDON RETAIL V1'. Below this, a table lists products. The first row is highlighted, and a small checkmark icon is in the 'Product Name' column. To the right of the table, there's a pencil icon in a blue box, which is the 'EDIT' button mentioned in the text. The table has columns: Product Name, Bar Code, Price, Qty on Hand, Profit Margin, and Active.

Product Name	Bar Code	Price	Qty on Hand	Profit Margin	Active
New Product Name	123456789	4.20	1	0.05	true
BREAD PAN GARLIC TOAST 42G	4800194173230	8.91	100	0.15	true
BREAD PAN CHEESE & ONION 42G	4800194173223	8.91	100	0.15	true
BREAD PAN BUTTERED TOAST 42G	4800194173681	8.91	100	0.15	true
BOY BAWANG GARLIC 120X30G	4809011681279	5.29	100	0.15	true
BOY BAWANG GARLIC 10G (10X12)	4809011681262	12.08	100	0.15	true
BOY BAWANG GARLIC 100G	4809011681378	15.34	100	0.15	true
BOY BAWANG CHILI CHEESE 120X30G	4809011681286	5.18	100	0.15	true
BOY BAWANG CHILI CHEESE 100G	4809011681392	15.24	100	0.15	true
BOY BAWANG ADOBO 30G	4809011681071	5.18	100	0.15	true

Screenshot 2.7

The system will direct the user to the product's profile (see screenshot 2.8). Press  button to start editing. Select the specific field that needs to be edited. After editing the product's details, press  button to save the changes made. The product's profile will be updated as soon as the changes get saved.

The screenshot shows the 'Update Record' form for a product profile. The form is divided into two main sections: 'General Information' and 'Update Record'. The 'General Information' section includes fields for 'Main Code' (00051), 'Product Category' (LAUNDRY MATERIALS), 'Product Name' (New Product Name), and 'Bar Code' (123456789). The 'Update Record' section includes fields for 'Unit of Measure in Receiving' (piece), 'Unit of Measure in Releasing' (piece), 'Type' (standard), 'Location' (Section-A), 'Tax' (vat in), and 'Profit Margin' (0.0500). There is a checkbox for 'This is active' which is checked. At the bottom right, there are 'CANCEL' and 'SAVE CHANGES' buttons.

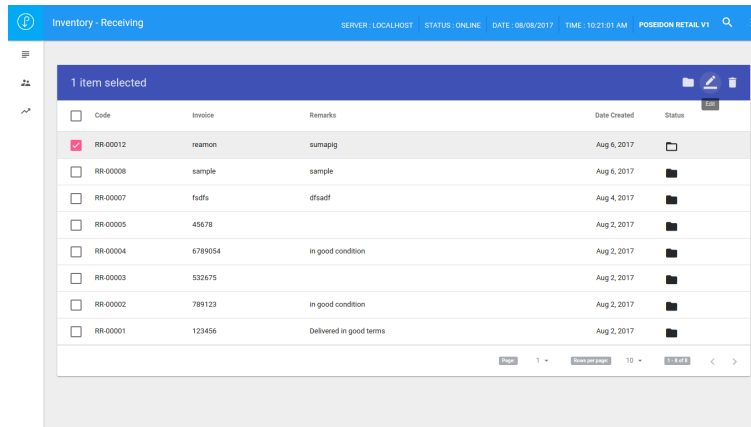

General Information	
Main Code	00051
Product Category	LAUNDRY MATERIALS
Product Name	New Product Name
Bar Code	123456789

Update Record	
Unit of Measure in Receiving	piece
Unit of Measure in Releasing	piece
Type	standard
Location	Section-A
Tax	vat in
Profit Margin	0.0500
☒ This is active	

Screenshot 2.8

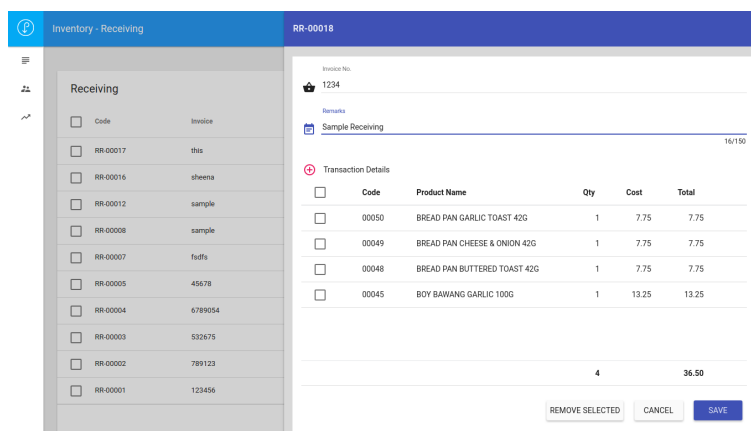

3.2.4 Editing the Receiving of Products

Editing the receiving of products can be done by simply selecting the desired received product and by pressing the  button (see screenshot 2.9).

Screenshot 2.9

The system will then direct to transaction details (see screenshot 3.0). The user can now proceed in editing the transaction details.

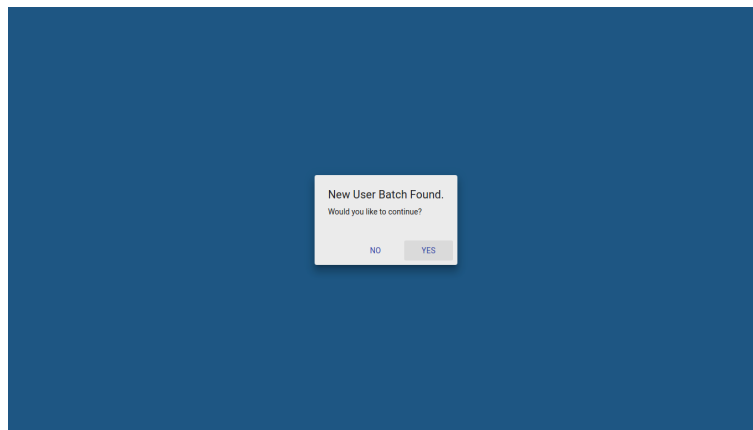

Screenshot 3.0

After editing the details, press  button to save all the changes made. A notification prompt will appear on the screen, confirming that the user has saved the changes successfully.

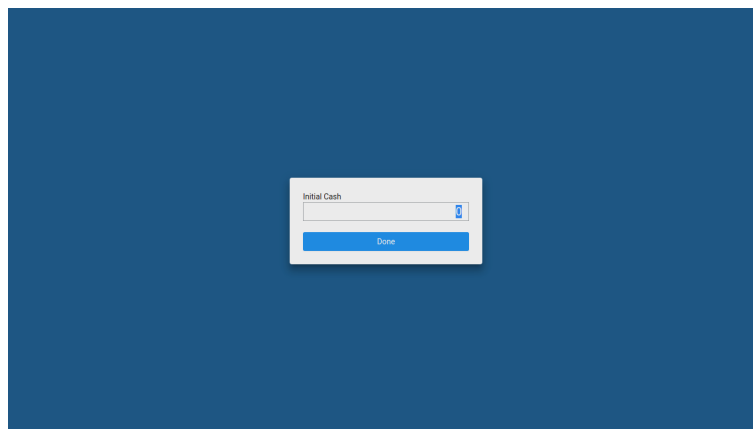

4 Cashiering

Normally, the system requires the user or cashier to enter a valid username and password to be able to log in to POS system. This is to make sure that each sales transaction is credited to a particular user. After a successful login, the system will automatically create a new batch for the current user (see screenshot 3.1). Press to proceed.

Screenshot 3.1

An **initial cash** prompt will appear on the screen (see screenshot 3.2), requiring the user to declare and enter the amount of initial cash on hand.

Screenshot 3.2

Initial cash refers to the starting cash amount for the start of a cashier's shift. Specifying the amount of initial cash on hand allows the system to track how much is added to the cash drawer during the current batch.

Once done in typing the amount, press the  button to proceed.

After entering the initial cash amount, the system will then direct to the user's workspace (see screenshot 3.3)

Screenshot 3.3

4.1 Familiarizing the POS View Screen

The **POS View Screen** is where all of your sales transactions are going to take place. It displays sales transaction details as well as function buttons that are used in performing a transaction.

Screenshot 3.4

1. **Search Box** – a space where you can type and search words to easily find an item's description
2. **Fields** – display a list of products and its details such as prices, quantity, etc.
3. **Product Selection Table** – displays information of the current transaction such as the items, quantity, and price
4. **Task Menus** – display task information. For example: **CANCEL TRANSACTION**
5. **Status Bar** – displays information such as the current date and time
6. **Totals** – display the subtotal of the items in the product selection table

4.2 Entering Items to a Transaction

Adding items is the very first step to process a sales transaction. To add an item to the transaction, the user can either scan the item's bar code using the barcode scanner or just simply type the item's description in the search box and select the particular item from the list.

The system will then add the selected item to the transaction and will display the **quantity box** (see screenshot 3.5). The user can now type the quantity of the item that the customer wants to buy then click [**ENTER**].

Screenshot 3.6

4.3 Settling the Transaction

After the cashier has entered all the items that the customer wants to buy, the next thing to do is to settle the transaction.

To settle the current transaction, click . This button is located on the upper right side of the control panel (see screenshot 3.7) .

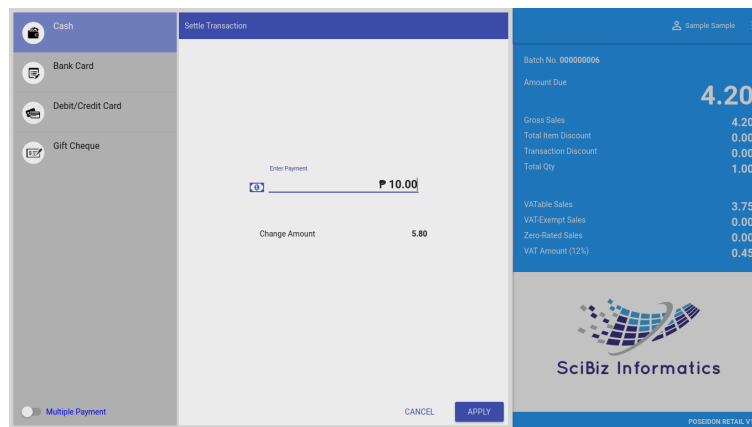

Select and press  button.

Screenshot 3.7

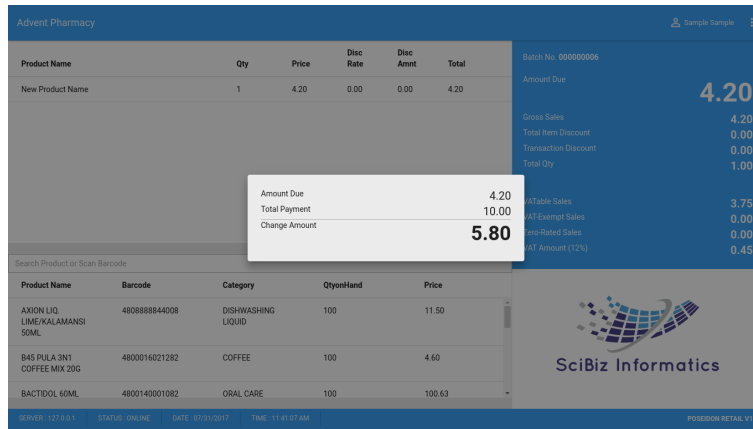

4.3.1 Receiving Payment from Customer

After selecting the [SETTLE] button, type the amount of payment paid by the customer and press  button (see screenshot 3.8).

Screenshot 3.8

After successfully settling the transaction, a prompt showing the amount due, total payment, and change amount will appear on the screen (see screenshot 3.9) and the cash drawer will automatically open.

Screenshot 3.9

Note

At the end of every sales transaction, the cash drawer opens automatically.

4.4 Changing an Item's Quantity

There are some instances where a customer suddenly decides to buy more of an item. All the cashier needs to do is just change the item's quantity entered.

To change the item's quantity, click [**Ctrl+E**] (the mode of the system will then be changed to edit mode), highlight the specific item whose quantity needs to be changed (see screenshot 4.0).

Product Name	Qty	Price	Disc Rate	Disc Amnt	Total
AXION LIQ. LIME/KALAMANSI 50ML	5	11.50	0.00	0.00	57.50

Product Name	Barcode	Category	QtyonHand	Price
AXION LIQ. LIME/KALAMANSI 50ML	480888844008	DISHWASHING LIQUID	100	11.50
B45 PULA 3M1 COFFEE MIX 20G	4800016021282	COFFEE	100	4.60
BACTIDOL 60ML	4800140001082	ORAL CARE	100	100.63

Screenshot 4.0

Press the  button, select , and type the new quantity of the item.

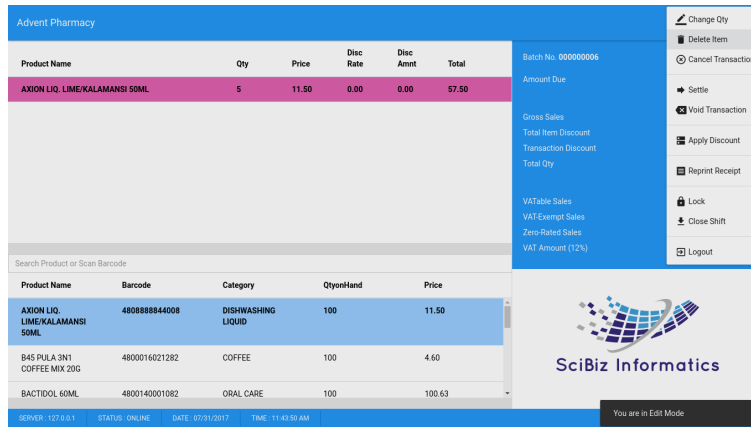

The user can also scan the particular item repeatedly to increase its quantity.

4.5 Deleting an Item from the Transaction

There are also situations where a customer decides not to include an item that has already been added to the transaction or in some instances, the cashier has entered a wrong item.

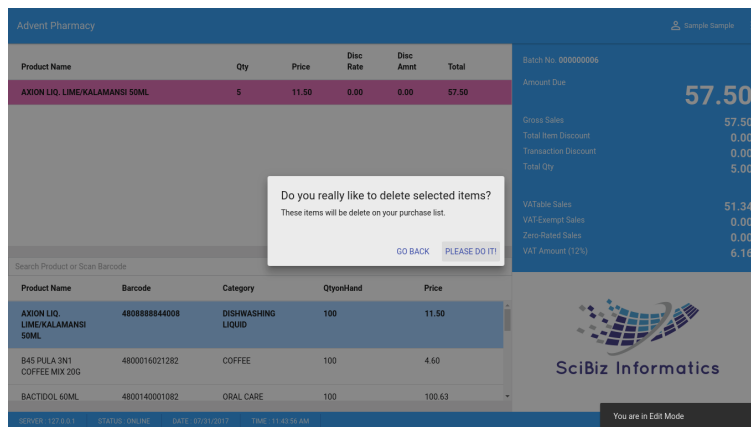

To know more about **deleting an item** from the purchase list, turn to **page 25**.

So to remove or delete an item from the purchase list, click [**Ctrl+E**], highlight the particular item that you would like to delete from the product selection table, press  button, and select the  button (see screenshot 4.1).

Screenshot 4.1

As soon as the user selects the [**DELETE ITEM**] button, a prompt confirming the action will pop up on the screen (see screenshot 4.2). Press  to delete and the item will then be removed from the product selection table.

Screenshot 4.2

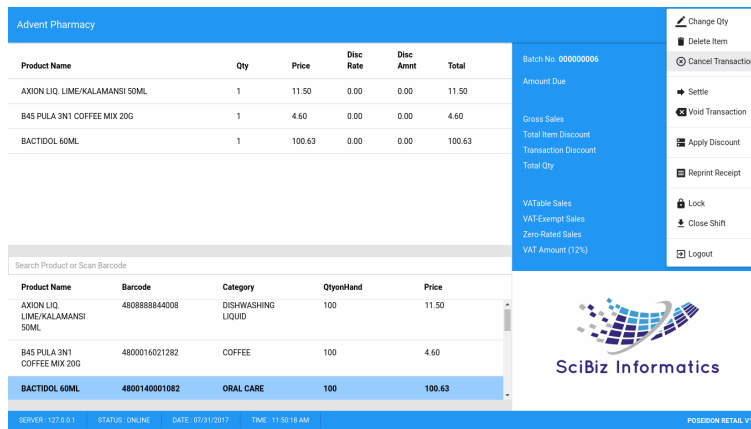

Note

If the item, which the user wants to delete, is the only item in the purchase list, the entire sales transaction will then be automatically cancelled.

4.6 Cancelling a Transaction

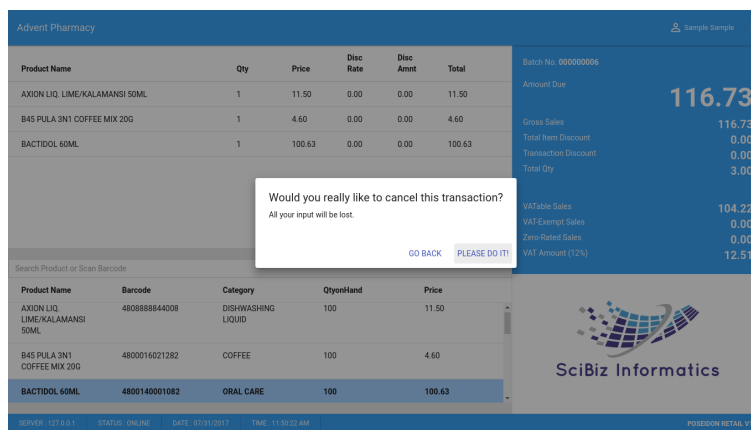

There are some instances where a customer makes a last-minute decision not to buy the items that had already been added to the purchase list resulting to cancellation of transaction.

To cancel a transaction, just simply click  and select the  button (see screenshot 4.3)

Screenshot 4.3

After selecting the [**CANCEL TRANSACTION**] button, a prompt asking for confirmation will appear on the screen (see screenshot 4.4). Press  button.

Screenshot 4.4

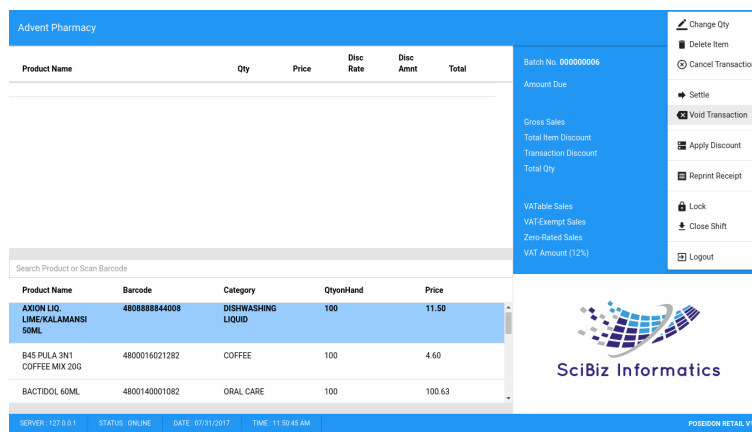

The system will automatically cancel the current transaction.

4.7 Void Transaction

Making a transaction void will result to cancellation of the customer's purchase. This means that the sales transaction will no longer be valid.

This can happen if for example a customer, who just paid, suddenly realizes that the cashier accidentally included some items of the next customer to her purchased items.

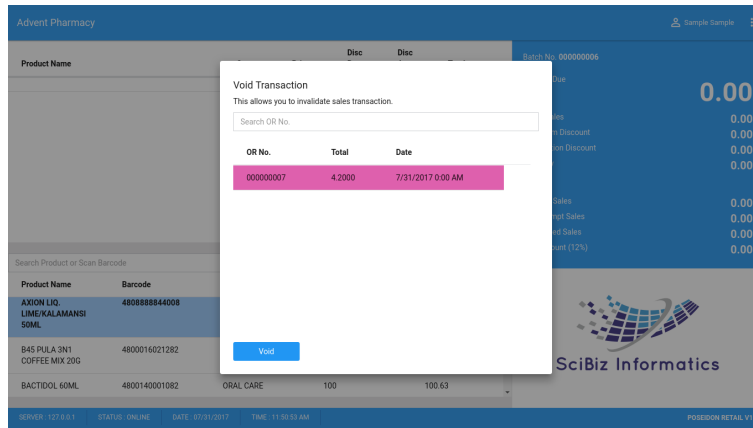

To void or invalidate a transaction, click  button from the control panel and select  button (see screenshot 4.5).

Screenshot 4.5

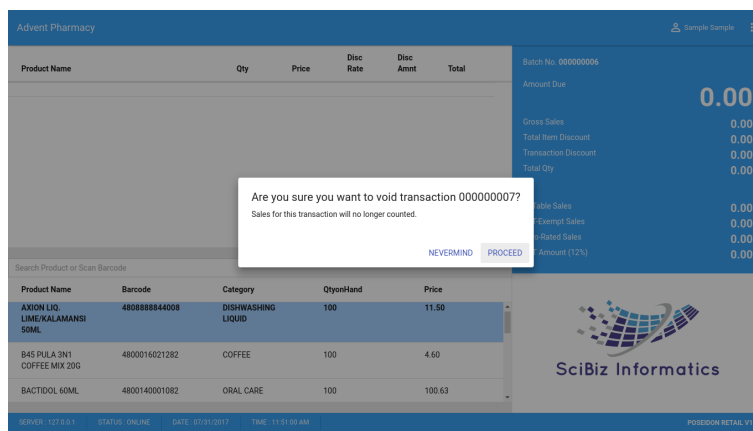

The user is required to enter the OR No. of the transaction that he or she wants to void. In the Receipt List, highlight the OR No. and select the  button (see screenshot 4.6).

For more details about **void transaction**, see **page 28**.

Screenshot 4.6

After choosing the OR No. of the transaction, which the cashier wishes to void, a prompt confirming the void will pop up on the screen (see screenshot 4.7).

Screenshot 4.7

Press the  button to complete the process.

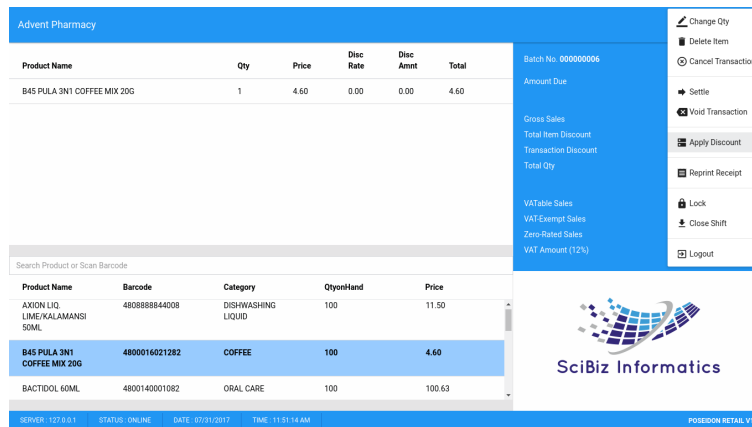

The transaction is now invalid. Also, the sales for the voided transaction will no longer be counted; however, it will still be included in the sales report of the user or cashier.

4.8 Applying Discounts

With **Poseidon Retail**, the user can choose between two kinds of discount: the transaction discount and the item discount.

- **Transaction discount** – refers to the discount applied to the entire sales transaction.
The discount may be applied by amount or by percentage.
- **Item discount** – refers to the discount applied to a single product in an order.

To apply discount to a single item, click  button and select  (see screenshot 4.8)

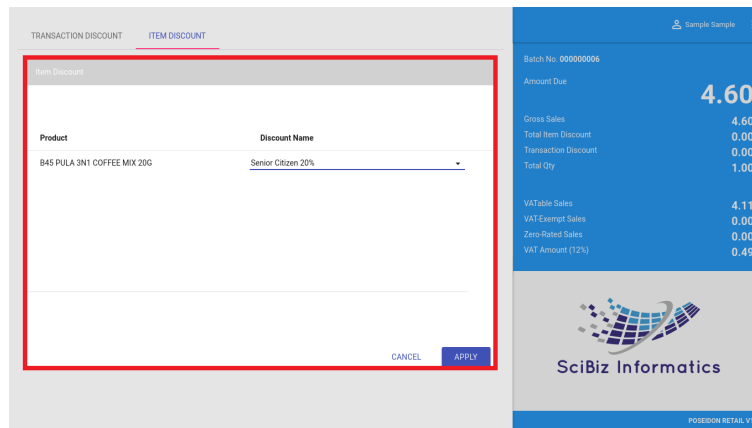

Product Name	Qty	Price	Disc Rate	Disc Amnt	Total
B45 PULA 3M1 COFFEE MIX 20G	1	4.60	0.00	0.00	4.60

Product Name	Barcode	Category	QtyonHand	Price
AXION LIQ. LIME/KALAMANSI 50ML	4808888844008	DISHWASHING LIQUID	100	11.50
B45 PULA 3M1 COFFEE MIX 20G	4800016021282	COFFEE	100	4.60
BACTIDOL 60ML	4800140001082	ORAL CARE	100	100.63

Screenshot 4.8

A table showing the product name and the discount name will appear. Type the product's name and the discount name, which you wish to apply.

In **screenshot 4.9**, it is shown that a 20% discount was applied to the product B45 PULA 3N1 COFFEE MIX 20G. Select **APPLY** button to apply the discount.

The screenshot shows a dialog box titled 'Item Discount' with a red border. It contains a table with two columns: 'Product' and 'Discount Name'. The product 'B45 PULA 3N1 COFFEE MIX 20G' is listed with the discount 'Senior Citizen 20%'. At the bottom right of the dialog are 'CANCEL' and 'APPLY' buttons. To the right of the dialog is a summary panel with a blue header and a list of financial figures.

Product	Discount Name
B45 PULA 3N1 COFFEE MIX 20G	Senior Citizen 20%

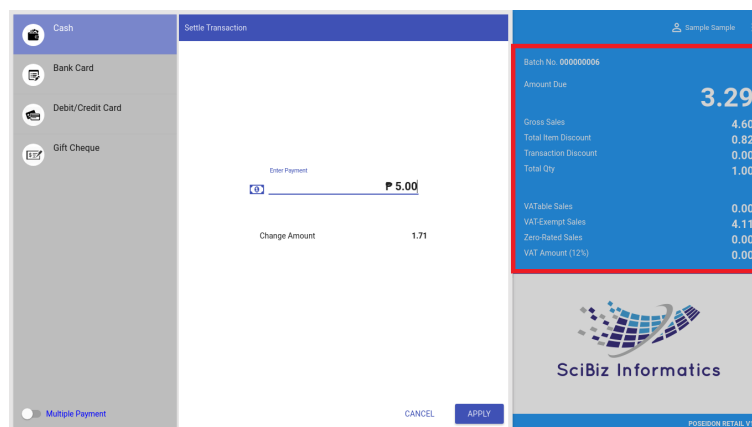

CANCEL APPLY

Batch No. 000000006
Amount Due **4.60**
Gross Sales 4.60
Total Item Discount 0.00
Transaction Discount 0.00

Screenshot 5.1

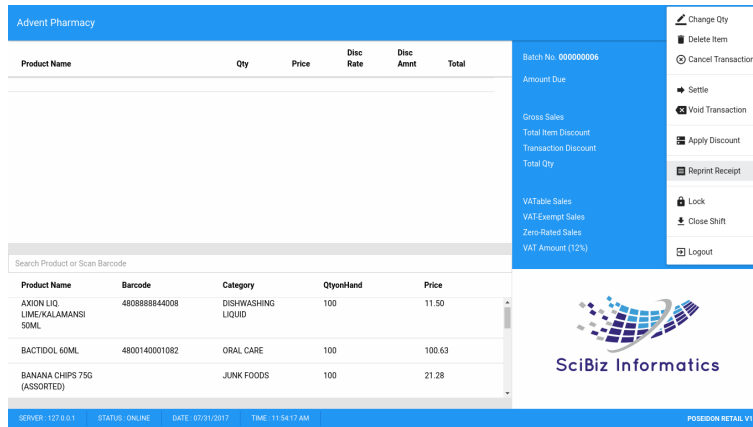

Note

Applying discounts may depend on the store owner though.

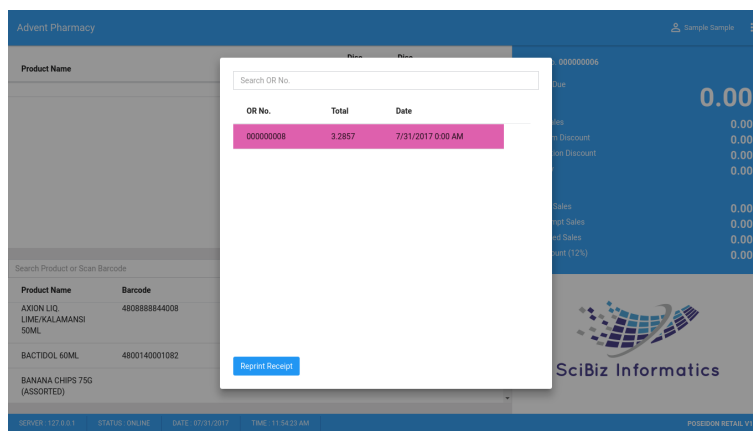

4.9 Reprinting Receipts

If the user wishes to reprint the latest receipt printed to the receipt printer or the receipt from the previous transactions, while not currently having a transaction, click  button which is located on the upper right side of the control panel and press  button (see screenshot 5.2).

Screenshot 5.2

Enter or search the OR No. of the receipt that you wish to reprint and press  button (see screenshot 5.3).

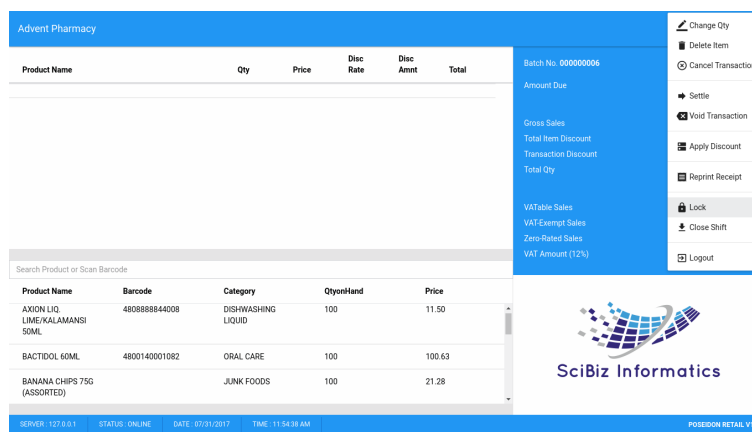

Screenshot 5.3

Your receipt will then be printed by your receipt printer.

4.10 Locking the Register

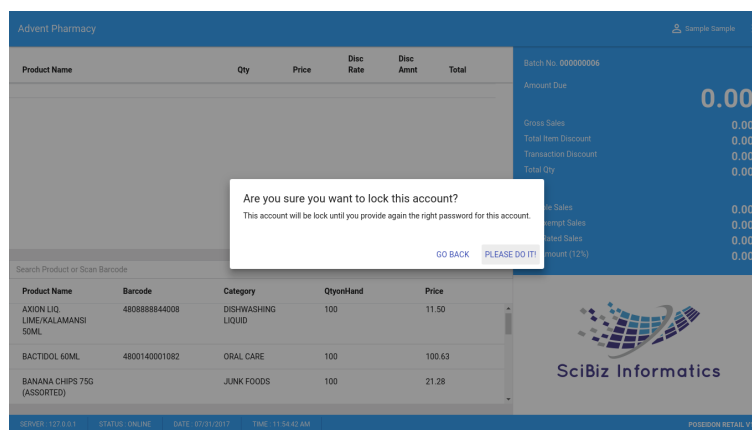

This feature of the **Poseidon Retail** allows the cashier to secure his account. For example, the user needs to pause the transaction for a while for some reasons, he can lock his account for security purposes. Once the user locks his register or batch, no other users can use the POS.

In order to lock the current register, click  button and press the  button (see screenshot 5.4).

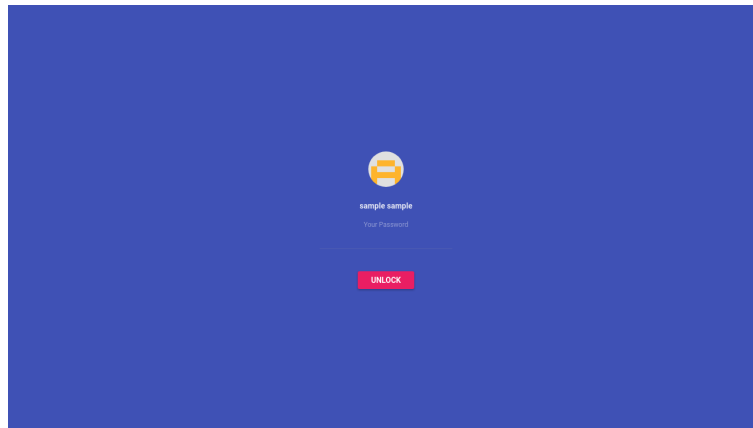

Screenshot 5.4

A prompt confirming the action will pop up on the screen (see screenshot 5.5). Press  to continue.

Screenshot 5.5

The user will be automatically logged out and the system will display the login dialog box (see screenshot 5.6)

Screenshot 5.6

Note

Once the account has already been locked, the user will no longer be able to cancel the login dialog box. The current account will be locked until the user provides a valid password.

4.10.1 How to Resume POS Use

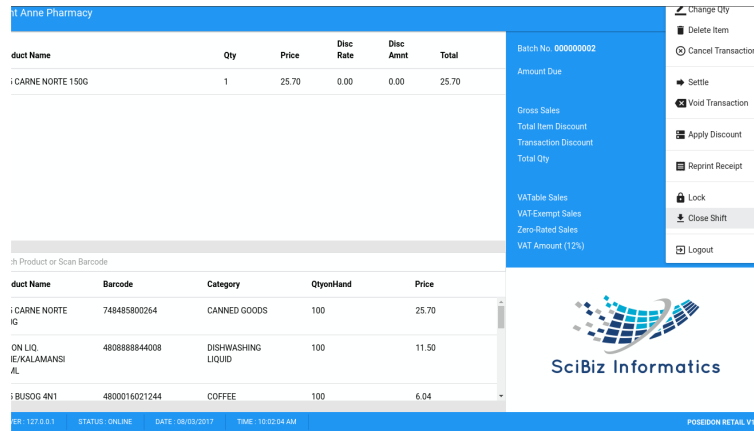

In order to go back to the transaction, the user needs to provide his password.

Type valid password and press **UNLOCK** . After successfully entering the password, the system will direct the user back to his workspace.

4.11 Closing your Shift

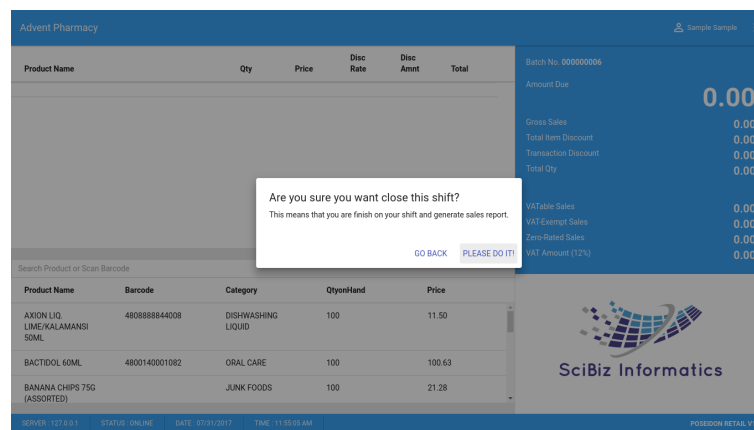

Once the user decides to close his shift, the system will automatically generate a sales report of the current user.

To close shift, click  button and select  button (see screenshot 5.7).

Screenshot 5.7

A prompt asking for confirmation about closing the shift will appear on the screen (see screenshot 5.8). Press  button to proceed.

Screenshot 5.8

To know more information about **closing your shift**, turn to **page 36**.

After the user closes his shift, a table showing the cash denomination will appear (see screenshot 5.9) wherein the cashier must count the amount of sales for his current shift. shift.

Product Name	Qty	Price	Disc Rate	Disc Amnt	Total
AXION LIQ. LIME/KALAMANSI 50ML	480888884				
BACTIDOL 60ML	480014001082	ORAL CARE	100	100.63	
BANANA CHIPS 75G (ASSORTED)		JUNK FOODS	100	21.28	

Drawer	Batch No.	Money Count	Initial Cash	Expenses	Gross Sales	Void	Item Discount	Transaction Discount	Sub Total	Net Sales	Discrepancy	Remarks
Sample Sample	000000006	1,300.00	1,000.00	0.00	8.80	4.20	0.82	0.00	3.29	3.29	296.71	

Screenshot 5.9

Cash denomination is a useful feature used to compare the physical money collected during the current shift with the amount of sales recorded by the system in order to avoid discrepancies.

After comparing the actual money in hand and the recorded sales, press the

Save

The user's receipt printer will then print an X-Reading Report.

5 Sales Reports

Poseidon Retail provides graphs and sales report feature that gives store owners a snapshot of the transaction activities that happened in a day (see screenshot 6.0).

Screenshot 6.0

The system enables the store owners to analyze their business' performance through reviewing these graphs and sales reports. The graphs and sales reports will help them figure out which products are bringing them the most profits and which of their products are bringing them the least. They will also be able to know how all their items on the shelves sell.

Moreover, this feature of Poseidon Retail allows store owners to have more control of their business. With the help of this report feature, they will be able to know whether they were able to meet their goals or not.

5.1 End of Day

This feature of the **Poseidon Retail** is the most special feature of the system. It is designed to consolidate all the information about the whole sales transactions that happened within the day, summarize all the sales activities of the store, and to literally end the day or shift.

It automatically clears all the tables used during the day, updates the inventory, and generates Z-read reports.

To finally end the day for all the sales transactions, just go to the left side of the control panel (see screenshot 6.1), press  Sales button, and select the  button.

<

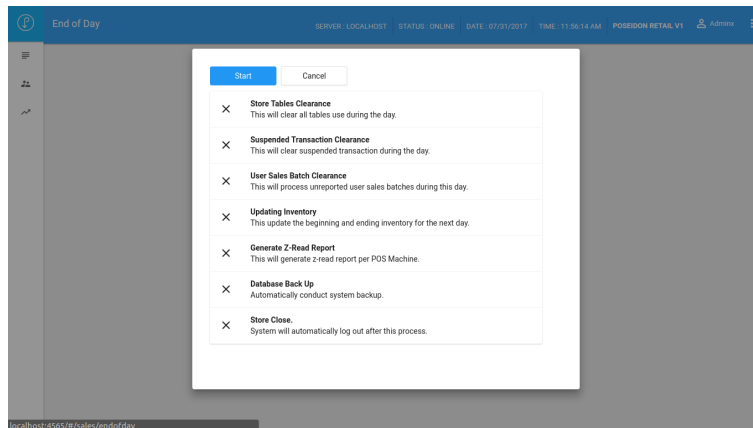

Screenshot 6.1

Note

Only authorized employees have the access to run the **end of day** process.

Press the  button to proceed (see screenshot 6.2).

Screenshot 6.2

The system will then consolidate all the shifts during the day and a **Z-reading report** will be printed after successfully closing the shift for an end-of-day summary of transaction activities.

Note

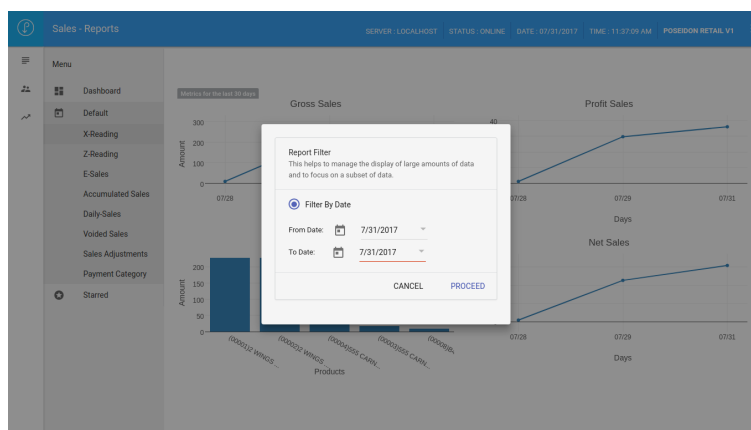

Running a Z-read report will reset the cash register's transaction information. The sales totals will then be set back to zero and the last line of the history table will be closed out with the date and time of the last sale

5.2 X-Read Report

An **X-read report** is a detailed report of the sales of the current cashier. Running an X-read report does not reset the cash register's transaction information.

Some managers may want to check the store's sales totals from time to time. To access X-read reports, press  button which is located on the left side of the control panel, choose , and select the  button.

A dialog box requiring the user to choose the date of the report that he wants to access will appear on the screen (see screenshot 6.3). **From Date** means the starting point of the report while **To Date** means the ending point of the said report. Press  button.

Screenshot 6.3

This brings up the list of detailed reports of the cashiers during the chosen date (see screenshot 6.4). The user can now choose the desired report.

Batch Number	User	Time In	Beginning SI	Beginning Balance	Initial Cash	Gross
000000002	sample	07/29/2017 04:07 PM	000000001	9.2	0	222.7

Screenshot 6.4

To reprint a copy of x-read report, select the desired cashier, press  button, and select  . The x-read report will then be printed to the attached printer.

Note

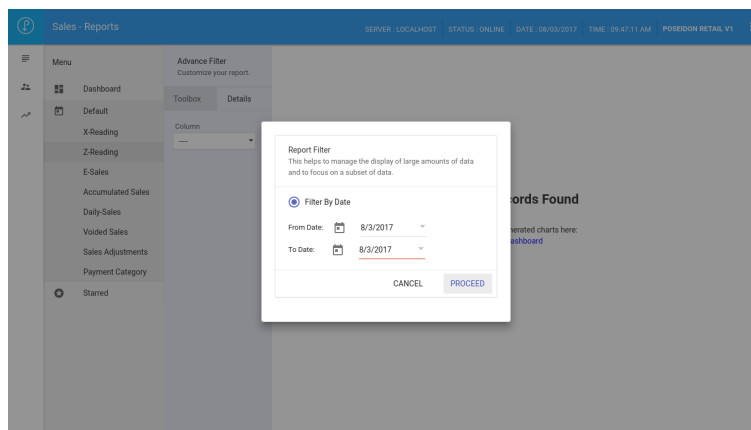

Only managers or authorized employees can filter other cashiers' X-read reports. Cashiers can only view their own X-read reports, which reflect the sales transactions they had during their shifts.

5.3 Z-Read Report

A **Z-read report** displays a summary of activities on particular register during shifts such as sales, return totals, and other details that happened in a particular register.

To access the z-read reports, press **[SALES]**, choose **[REPORTS]**, and select the  button.

Just like accessing the x-read reports, a dialog box requiring the user to choose the date of the report will pop up on the screen (see screenshot 6.5). Press  .

Screenshot 6.5

After choosing they desired date, the system will automatically display the list of z-read reports during the chosen date.

To reprint a copy of z-read report, choose a particular user or cashier whose z-read report you want to reprint, press  button and select  . Your receipt printer will then print the Z-read report.

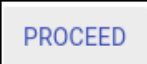

Note

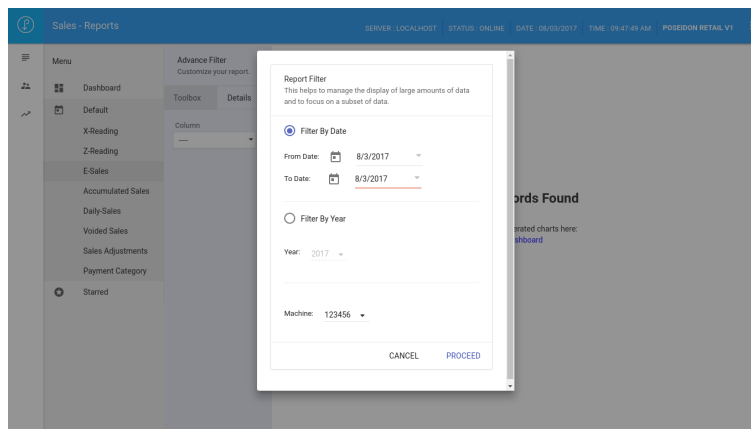

Only authorized employees can run and filter the z-read reports.

5.4 E-Sales Report

The **E-sales report** automates the process of monitoring and reporting of the gross monthly sales of taxpayers per registered Point of Sale (POS) System.

To access the E-sales reports, just press the [**SALES**] button, choose [**REPORTS**], and select  .

The user will be asked to choose the machine number and the date of the report that he wants to access (see screenshot 6.6). Hit the  button.

Screenshit 6.6

The system will then display the E-sales report. The user can now view the E-sales report.

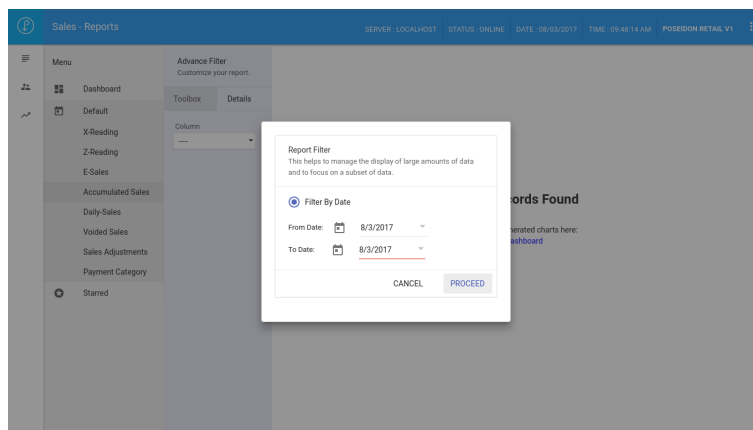

5.5 Accumulated Sales Report

This report displays the total amount an investment currently holds, including the capital invested and the interest gained to date.

The accumulated sales report includes details such as name of the user, machine number, date, beginning and ending balance.

To view the accumulated sales report, simply press [**SALES**] button, click [**REPORTS**], and select Accumulated Sales button.

The user needs to choose the date of the accumulated sales report that he wants to view (see screenshot 6.7). Then click PROCEED button.

Screenshot 6.7

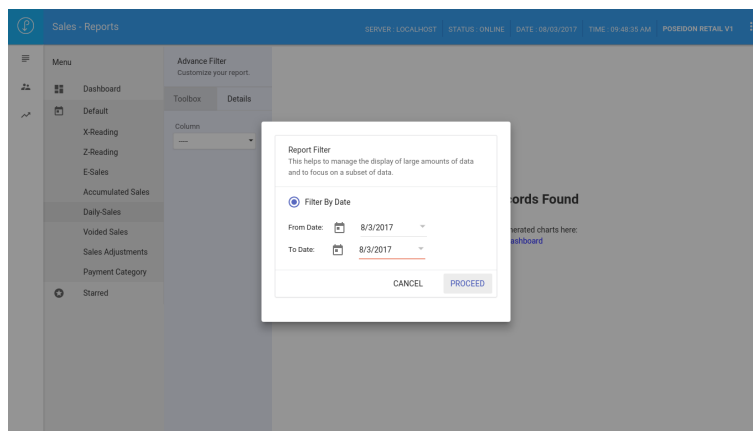

The chosen report will then be displayed by the system.

5.6 Daily Sales Report

Daily sales report displays reports about your total sales per day. This can help you keep track of all your sales transactions and inventory within the day.

To access the daily sales reports, click the **[SALES]** button on the left side of the control panel, choose **[REPORTS]**, and select the **Daily-Sales** button.

Set your desired date range and press **PROCEED** (see screenshot 6.8).

Screenshot 6.8

The system will then display the list of daily sales reports.

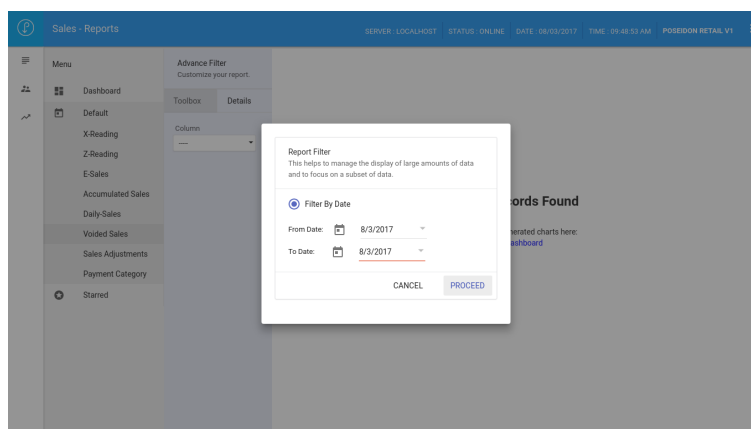

5.7 Voided Sales Report

This report generates a list of voided sales within a particular day. It displays descriptive information on each voided sale. The information includes the batch code, user, reference date, machine number, and the person who granted the void.

With the help of this report, you will be able to know who exactly among your staff members had processed the sales transaction and had authorized its void.

To access the voided sales reports, press [**SALES**] button, choose [**REPORTS**], and select  button.

The user will be asked to choose a specific date (see screenshot 6.9). Choose the date of the report that you want to view and click  button.

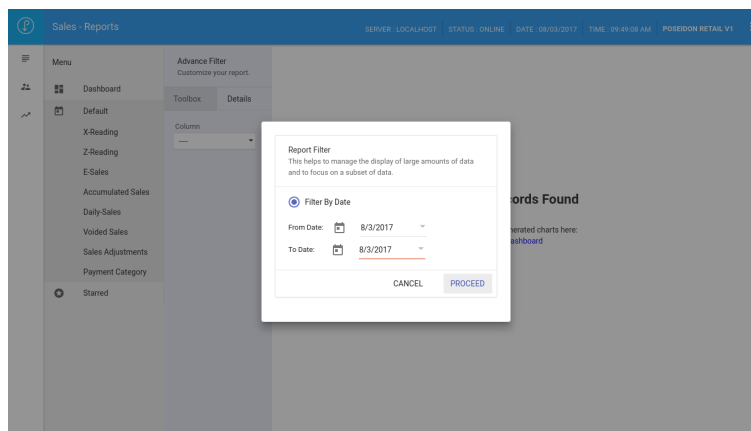

Screenshot 6.9

A list of voided sales will then be displayed on the screen.

5.8 Sales Adjustment Report

To view the sales adjustment report, simply press **[SALES]** choose **[REPORTS]**, and select  button.

A dialog box, asking the user to choose a specific date, will appear on the screen (see screenshot 7.0). Press .

Screenshot 7.0

The list of the sales adjustment reports will then be displayed by the system.

5.9 Payment Category Report

The system is designed to accept different types of payment method such as **cash, bank cards, debit or credit cards, and gift cheques.**

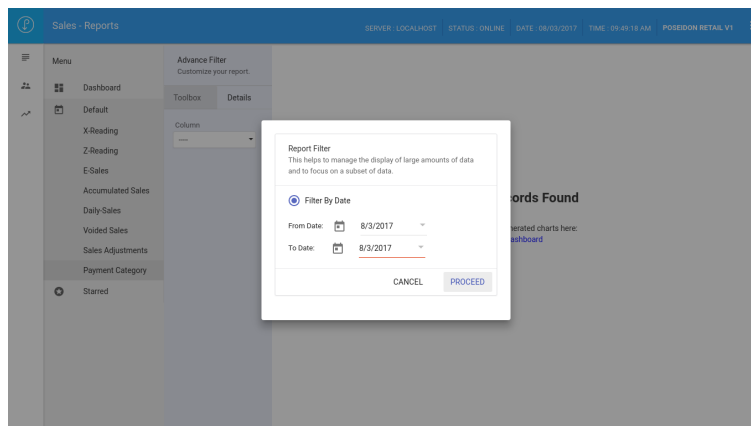

The POS **payment category report** displays a summary of the total sales collected which helps store owners to track the cash flow, debit or credit card payments, and gift cheques.

To view the payment reports, click [**SALES**] button, choose [**REPORTS**], and select

Payment Category

The user will be asked to choose the date of the report that he wants to access (see screenshot

7.1). Press the **PROCEED** button.

Screenshot 7.1

The system will then display the desired report.
